*A special thank you to everyone who purchased  
cattle for us this past year!*

# Schmig Simmental Ranch

## 40TH ANNUAL PRODUCTION SALE

Thursday, March 9, 2023

1:00 p.m.

**Sale will be held at the Ranch located**  
2 miles East, 2 miles North, 1 mile East, and  
2/3 mile South of Stockholm, South Dakota

### Sale Day Mobile Phone Numbers:

507-530-4057 Gared or

605-520-5120 Dan

**Home Phone:** 605-676-2320 Joanne

or 605-886-8877 Dan

**Auctioneer:** JIM THORPE

Complimentary lunch from  
11:30 a.m. to 1:00 p.m.

Welcome to the 40th Annual Schmig Simmental Production Sale. Thyen Farms will again be a guest consignor.

In mid September when Dennis passed away I thought we couldn't possibly do this again but when Dennis' grandson, Gared Moore, offered to help with the cattle, we decided to keep them and give it a try. We are trying to follow the same program Dennis used as best we can. Gared has a similar passion for the Simmental breed as his grandpa did. He can tell you some of the details of what has been done. - Joanne

We worked and weighed our calves on the 30th of September, but didn't wean until October 21st. On January 27th we clipped bulls. On February 8th we measured scrotal, weighed, poured, and gave the first foot rot vaccination. The Simmental and Angus bulls receive the same standard vaccination program. We will give our Simmental bulls the vaccine booster and a preventative hardware magnet when we do our fertility check in April.

We can keep our Simmental bulls free of charge until May 1st and continue to grow them. After that I will deliver them free of charge up to 250 miles.

We will use DV Auction again this year, if you are unable to attend the sale you can watch and bid online. We will also take phone bids. You can go to our website to find more information on the bulls.

We welcome everyone to stop by the ranch to view the bulls before sale day. We hope to see you at the sale and thank you to all our past buyers.

Sincerely,

Gared Moore and Joanne Schmig

## A QUICK REFERENCE TO AN EXPLANATION OF EPDs:

Expected Progeny Differences (EPDs) are the most accurate and effective tool available for comparing genetic levels. In using EPDs the differences between two sires EPDs represents the unit difference expected in the performance of the progeny. (Listed below are the units ASA EPDs are expressed in:)

**Calving Ease (CE):** Percent of unassisted births when used on heifers

**Birth Weight (BW):** Pounds of birth weight

**Weaning Weight (WW):** Pounds of weaning weight

**Yearling Weight (YW):** Pounds of yearling weight

**Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters

**Maternal Milk (MM):** Pounds of weaning weight due to milk

**Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth

**Stayability (STAY):** Percent of daughters remaining in the cow herd at six years of age

**Docility Score (DOC):** The higher the number, the better the score

**Carcass Weight (CW):** Pounds of carcass weight

**Yield Grade (YG):** Yield Grade Score

Yield grade is an indication of the yield of red meat within a carcass. It is calculated by using several factors including: 1) fat thickness; 2) kidney, pelvic and heart fat; 3) hot carcass weight; 4) rib-eye area. A (-) EPD is better.

**Marbling (MRB):** Marbling score

**Indexes:** The last two columns in the EPD section are fairly new to the Simmental Breed, by interesting, they are \$ indexes. Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's were \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line.

**All Purpose Index (API):** It's exactly what it says, all purpose, this index includes every trait that can be calculated, calving ease, pounds at weaning and yearling keeping replacements back, milking ability and stayability, then the calf crop. It took into consideration some being retained as replacements, then the rest being fed off and sold grade and yield.

**Terminal Index (TI):** This index is to be used if all calves are going to a feedlot. It evaluates a sire for use only on mature cows with all calves put on feed and some grade and yield. No other factors were figured in.

Using API and TI, first determine which index to use, if you're breeding heifers and keeping replacements, use API, if all calves are going to the feedlot and finished, then use TI.
